

## PRESS RELEASE

### INNIO named to prestigious A List for supplier engagement

**JENBACH, Austria** – August 5, 2025 – INNIO Group has been recognized by the prestigious global non-profit environmental organization [CDP](#) for its strong engagement with suppliers on climate change topics, earning a place on CDP's 2024 Supplier Engagement A List. This recognition is awarded to companies that show outstanding transparency, ambition, and action in managing climate issues within their supply chains.

As part of its commitment to combating climate change and reducing overall emissions, INNIO is implementing environmental initiatives across its entire supply chain. INNIO delivers reliable, affordable, and sustainable energy solutions for a wide range of industrial sectors and critical infrastructure. The company's offerings range from decentralized and sustainable power generation to balancing renewables, as well as the combined provision of electricity, heating, and cooling.

By 2030, INNIO aims to reduce Scope 3 carbon emissions – indirect emissions along the value chain – including those from key raw materials, by 42%. More than 80% of INNIO's top 200 suppliers have committed to halving their greenhouse gas emissions by 2030.

CDP's annual environmental disclosure process is widely recognized as the leading independent standard for evaluating companies' environmental performance. In 2024, only 6% of more than 22,700 companies assessed by CDP made the Supplier Engagement A List, highlighting the significance of this achievement.

Additional details can be found in INNIO's 2024 Sustainability Report [here](#).
