

Dr. Andreas Kunz oversees the entire Technology function of INNIO Group.

Dr. Andreas Kunz

Chief Technology Officer

Andreas' responsibilities include all areas across product development, re-search & development (New Technology Introduction and New Product Introduction) and order engineering for the delivery of customer-specified products.

With 20 years of experience in engineering and operations-related roles, Andreas brings significant technical expertise in the international reciprocating engines industry as well as extensive knowledge of international end customers in the power generation segment. Andreas joined INNIO Group from Rolls-Royce Power Systems AG in Friedrichshafen, Germany, where he spent most of his career and held the position of Vice President Engineering for all engine platforms until 2020. His previous roles included Vice President Manufacturing and Vice President Operations Onsite Energy as well as managing director at MTU Onsite Energy (today Rolls-Royce Solutions) in Augsburg, Germany.

Andreas has a doctorate in mechanical and combustion engineering from the University of Duisburg. In addition, he has engineering degrees from the University of Duisburg and the University of Wales.

About INNIO Group

INNIO Group is a leading energy solution and service provider that empowers industries and communities to make sustainable energy work today. With its Jenbacher and Waukesha product brands and its AI-powered myplant digital platform, INNIO Group offers innovative solutions for data center power infrastructure, distributed power generation, and compression applications. With its flexible, scalable, and resilient energy solutions and services, INNIO Group enables its customers to drive the energy transition across the energy value chain and ensures reliable energy supply even where the grid is not available.
